Contents

1	Executive Summary	1
1.1	Introduction	1
1.2	Polyethylene Terephthalate	3
1.2.1	Introduction	3
1.2.2	Profiles of Selected Chemical Recycling Technology Developers	4
1.2.3	Ranking of Chemical Recycling Technology Developers	4
1.2.4	Economic Analysis.....	6
1.3	Polystyrene	11
1.3.1	Introduction	11
1.3.2	Profiles of Selected Chemical Recycling Technology Developers	11
1.3.3	Ranking of Chemical Recycling Technology Developers	11
1.3.4	Economic Analysis.....	13
1.4	Mixed Plastics (PTF)	18
1.4.1	Introduction	18
1.4.2	Profiles of Selected Chemical Recycling Technology Developers	19
1.4.3	Ranking of Chemical Recycling Technology Developers	19
1.4.4	Economic Analysis.....	21
1.5	Municipal Solid Waste.....	22
1.5.1	Introduction	22
1.5.2	Mass Burn/Incineration/Waste-to-Energy	23
1.5.3	Landfill/Dumps	23
1.5.4	Economic Analysis.....	24
1.6	Conclusions	24
2	Introduction to Recycling	27
2.1	Waste Overview	27
2.1.1	Waste Disposal Methods.....	28
2.1.2	The Plastic Waste Problem	29
2.1.3	Advantages of Plastics	33

2.1.4	Thermoplastic Materials	34
2.1.5	Thermosetting Materials	34
2.1.6	Types of Plastic in a Plastic Waste Stream	34
2.1.7	Durable versus Single-Use.....	38
2.2	Recycling Process/Value Chain.....	39
2.2.1	Overview	39
2.2.2	Plastics Recycling Participants.....	40
2.2.3	Collection	41
2.2.4	Sorting and Washing	43
2.2.5	Recycling.....	44
2.2.6	Refabrication/Reuse	46
2.3	Recycling Regulation/Legislation and Partnerships.....	47
2.3.1	United States.....	48
2.3.2	Europe.....	56
2.3.3	Asia Pacific.....	61
2.4	Strategies of the Plastics Industry in Response to Concerns about Plastics Waste	66
2.4.1	Producer Strategies	67
2.4.2	Processor Strategies	68
2.5	Introduction to Chemical Recycling	69
3	Polyethylene Terephthalate	73
3.1	Introduction to Conventional Technology	73
3.1.1	Transesterification of Dimethyl Terephthalate	73
3.1.2	Esterification of Purified Terephthalic Acid	73
3.1.3	Conventional Melt-Phase PolyCondensation of Bis-HET	74
3.1.4	Conventional Solid-State Polymerization.....	74
3.1.5	The Preform System.....	75
3.2	Introduction to PET Chemical Recycling Technology	75
3.2.1	Recycled PET	79
3.2.2	Aminolysis	80
3.2.3	Ammonolysis.....	81
3.2.4	Glycolysis	81
3.2.5	Hydrolysis.....	87
3.2.6	Methanolysis	87
3.3	High Level Profiles of Selected Chemical Recycling Technology Developers	89
3.3.1	Axens	89
3.3.2	Bioplastech.....	92
3.3.3	Carbios	92
3.3.4	Eastman.....	94
3.3.5	Garbo	97
3.3.6	Gr3n	97
3.3.7	JEPLAN.....	99
3.3.8	IBM	101
3.3.9	Ioniqa Technologies.....	104

3.3.10	Loop Industries	104
3.3.11	perPETual Global Technologies	107
3.3.12	Resinate Materials Group.....	110
3.3.13	RESYNTEX.....	113
3.3.14	SABIC.....	115
3.3.15	DuPont Teijin Films.....	116
3.3.16	Tyton BioSciences	119
3.4	Additional PET Recycling Technology Developers.....	120
3.5	Ranking of Profiled Chemical Recycling Technology Developers.....	122
3.5.1	Background (KT Decision-Making Model)	122
3.5.2	Evaluation Criteria and Weighting.....	122
3.5.3	Ranking Results.....	130
3.6	Economic Analysis	132
3.6.1	Investment Basis.....	133
3.6.2	Pricing Basis	133
3.6.3	Cost of Production Basis	135
3.6.4	Production Cost Estimates	135
3.6.5	Delivered Cost Analysis.....	148
3.6.6	Sensitivity Analysis	150
3.6.7	Conclusions.....	154
4	Polystyrene.....	157
4.1	Introduction to Conventional Technology	157
4.2	Introduction to Polystyrene Recycling Technology	158
4.2.1	Pyrolysis	161
4.3	High Level Profiles of Selected Chemical Recycling Technology Developers	163
4.3.1	Agilyx.....	163
4.3.2	GreenMantra Technologies.....	166
4.3.3	Indaver	167
4.3.4	INEOS	169
4.3.5	Polystyvert.....	169
4.3.6	Pyrowave	171
4.4	Additional Polystyrene Recycling Technology Developers.....	173
4.5	Ranking of Profiled Chemical Recycling Technology Developers.....	174
4.5.1	Background (KT Decision-Making Model)	174
4.5.2	Evaluation Criteria and Weighting.....	174
4.5.3	Ranking Results.....	180
4.6	Economic Analysis	182
4.6.1	Investment Basis.....	182
4.6.2	Pricing Basis	183
4.6.3	Cost of Production Basis	184
4.6.4	Production Cost Estimates	185
4.6.5	Delivered Cost Analysis.....	195
4.6.6	Sensitivity Analysis	197

	4.6.7	Conclusions.....	200
5		Mixed Plastics	202
	5.1	Introduction to Mixed Plastics Recycling Technologies	202
	5.1.1	Challenges to Full-Scale Commercialization of Mixed Plastics to Fuel Technology.....	204
	5.1.2	General Factors Affecting the Pyrolysis Process	208
	5.1.3	Technology Developers.....	213
	5.2	High Level Profiles of Selected PTF Companies	214
	5.2.1	Agilyx.....	214
	5.2.2	Blest.....	215
	5.2.3	Brightmark Energy (formerly RES Polyflow).....	217
	5.2.4	Fuenix Ecogy/Dow.....	219
	5.2.5	GreenMantra.....	219
	5.2.6	Klean Industries	221
	5.2.7	Mura Technology (Licella/Armstrong Energy joint venture)	224
	5.2.8	Nexus Fuels	227
	5.2.9	OMV	229
	5.2.10	Plastic Advanced Recycling Corporation.....	230
	5.2.11	Plastic Energy™	233
	5.2.12	Plastic2Oil	236
	5.2.13	Quantafuel.....	238
	5.2.14	Recenso	241
	5.2.15	Renewlogy	241
	5.2.16	Vadxx	245
	5.3	Additional Mixed Plastics Recycling Technology Developers	247
	5.4	Ranking of Profiled Chemical Recycling Technology Developers.....	248
	5.4.1	Background (KT Decision-Making Model)	248
	5.4.2	Evaluation Criteria and Weighting.....	248
	5.4.3	Ranking Results.....	255
	5.5	Economic Analysis	256
	5.5.1	Investment Basis.....	256
	5.5.2	Pricing Basis	257
	5.5.3	Cost of Production Basis	258
	5.5.4	Production Cost Estimates	258
	5.5.5	Sensitivity Analysis	262
	5.5.6	Conclusions.....	264
6		Municipal Solid Waste.....	267
	6.1	MSW as an Important Resource.....	268
	6.2	Resource Recycling via MRF.....	269
	6.3	Mixed Plastic Waste to Fuels or Chemicals	271
	6.3.1	Gasification	272
	6.3.2	Pyrolysis	273
	6.4	Mass Burn/Incineration/Waste-to-Energy (WTE).....	273

6.5	Landfill/Dumps.....	276
6.5.1	Types of Landfills/Dumps.....	276
6.5.2	Landfill Tipping Fees.....	277
6.6	Economic Analysis.....	281
6.6.1	Investment Basis.....	281
6.6.2	Pricing Basis.....	282
6.6.3	Cost of Production Basis.....	283
6.6.4	Production Cost Estimates.....	283
6.6.5	Sensitivity Analysis.....	285
6.6.6	Conclusions.....	286
7	Conclusions.....	287

Appendices

A	Polyethylene Terephthalate Cost of Production Estimates.....	290
B	Polystyrene Cost of Production Estimates.....	336
C	Mixed Plastics Cost of Production Estimates.....	371
D	Incineration with Energy Recovery Cost of Production Estimates.....	381
E	Definitions of Capital Cost Terms Used in Process Economics.....	386
F	Definitions of Operating Cost Terms Used in Process Economics.....	391

Nexant Inc.

SPECIAL REPORTS

The Nexant Special Reports program is recognized globally as the industry standard source for information relevant to the chemical process and refining industries.

Contact Details:

Americas:

Marcos Nogueira Cesar, Vice President, Global Products, E&CA: Nexant Subscriptions
Phone: + 1-914-609-0324, e-mail: mcesar@nexant.com

Erica Hill, Client Services Coordinator, E&CA-Products
Phone: + 1-914-609-0386, e-mail: ehill@nexant.com

EMEA:

Anna Ibbotson, Director, Nexant Subscriptions
Phone: +44-207-950-1528, aibbotson@nexant.com

Asia:

Chommanad Thammanayakatip, Managing Consultant, Energy & Chemicals Advisory
Phone: +66-2793-4606, email: chommanadt@nexant.com

Nexant, Inc. (www.nexant.com) is a leading management consultancy to the global energy, chemical, and related industries. For over 38 years, Nexant has helped clients increase business value through assistance in all aspects of business strategy, including business intelligence, project feasibility and implementation, operational improvement, portfolio planning, and growth through M&A activities. Nexant has its main offices in San Francisco (California), White Plains (New York), and London (UK), and satellite offices worldwide.
