Contents

1 Executive Summary .................................................................................................................. 1
  1.1 Introduction .......................................................................................................................... 1
  1.2 Occurrence ........................................................................................................................... 1
  1.3 Mining Methods and Beneficiation ...................................................................................... 3
  1.4 Commercial Technologies ................................................................................................. 4
    1.4.1 Sedimentary Copper-Cobalt Deposit Process Technology .................................................. 5
    1.4.2 Laterite Process Technology .......................................................................................... 5
    1.4.3 Final Product Polishing Steps ....................................................................................... 6
  1.5 Emerging Technologies ....................................................................................................... 6
    1.5.1 Ore Processing Technologies ....................................................................................... 6
    1.5.2 Battery Recycling ......................................................................................................... 7
  1.6 Process Economics ............................................................................................................ 8

2 Introduction ............................................................................................................................. 12
  2.1 Industry .................................................................................................................................. 12
    2.1.1 Value Chains .................................................................................................................. 12
    2.1.2 History .......................................................................................................................... 17
    2.1.3 Business Developments ............................................................................................... 17
  2.2 Technology and Licensing .................................................................................................. 21
    2.2.1 Commercial Technologies ........................................................................................... 21
    2.2.2 Developments in Technology ....................................................................................... 22
  2.3 Occurrence ........................................................................................................................... 22
    2.3.1 Cobalt Minerals ............................................................................................................. 22
    2.3.2 Sediment Hosted/Strata-bound Deposits ...................................................................... 23
    2.3.3 Laterites ....................................................................................................................... 24
    2.3.4 Hydrothermal and Volcanogenic Deposits ................................................................... 24
    2.3.5 M magmatic Sulfides .................................................................................................. 24
    2.3.6 Precipitated Oxidized Deposits .................................................................................... 25
  2.4 Cobalt Resource Geography ............................................................................................... 25
    2.4.1 Cobalt-Bearing Mineral Production .............................................................................. 26
## Contents

2.4.2 Cobalt Processing ........................................................................................................... 27

3 Mining Methods and Beneficiation ...................................................................................... 30
  3.1 Mining Methods .................................................................................................................. 30
    3.1.1 Open Pit Mining ........................................................................................................... 30
    3.1.2 Hard Rock Underground Mining .................................................................................. 31
    3.1.3 Representative Mining Regions .................................................................................... 33
  3.2 Beneficiation Process Description ...................................................................................... 34
    3.2.1 Crushing and Screening ............................................................................................... 34
    3.2.2 Grinding ....................................................................................................................... 35
    3.2.3 Concentration and Separation ...................................................................................... 36
  3.3 Drying .................................................................................................................................. 43

4 Commercial Process Technologies ......................................................................................... 44
  4.1 Introduction .......................................................................................................................... 44
    4.1.1 Primary Separation and Leaching ............................................................................... 44
    4.1.2 Reduction and Recovery .............................................................................................. 45
  4.2 Copper-Cobalt Sedimentary Processing .............................................................................. 46
    4.2.1 Solvent Extraction/Electrowinning (SX/EW) Process .................................................... 46
    4.2.2 Downstream Cobalt Recovery Options ....................................................................... 50
  4.3 Nickel-Cobalt Laterite Processing ...................................................................................... 59
    4.3.1 Leaching/Extraction and Separation .......................................................................... 59
    4.3.2 Reduction and Recovery .............................................................................................. 68
  4.4 Final Product Polishing Steps ............................................................................................. 79

5 Emerging Process Technologies .............................................................................................. 86
  5.1 Introduction .......................................................................................................................... 86
  5.2 Leaching Processes .............................................................................................................. 87
    5.2.1 InCor Starved Acid Leaching (SALT) .......................................................................... 87
    5.2.2 Atmospheric Leaching (AL)/Agitated Tank Leaching ...................................................... 88
    5.2.3 Neomet Process ............................................................................................................ 91
    5.2.4 Direct Nickel (DNi) Nitrate Leaching Process ............................................................... 94
    5.2.5 Bacterial Leaching ....................................................................................................... 98
    5.2.6 Minor Technologies .................................................................................................... 100
  5.3 Refining Processes .............................................................................................................. 103
    5.3.1 Clean TeQ Clean-iX Continuous IX Technologies ....................................................... 103
    5.3.2 Innovation Metals Corp RapidSX .............................................................................. 104
    5.3.3 Minor Technologies .................................................................................................... 104
  5.4 Cobalt and Battery Recycling ............................................................................................ 105
    5.4.1 Overview ...................................................................................................................... 105
    5.4.2 Limitations of Battery Refurbishment ....................................................................... 106
    5.4.3 Process Challenges ..................................................................................................... 106
    5.4.4 Existing Processes and Operations .............................................................................. 107
    5.4.5 Developing Processes and Operations ....................................................................... 112

6 Process Economics .............................................................................................................. 119

TECHNOLOGY & COSTS

Technoeconomics - Energy & Chemicals (TECH)

The Nexant Subscriptions' Technoeconomics - Energy & Chemicals (TECH) program is recognized globally as the industry standard source for information relevant to the chemical process and refining industries. Technoeconomics - Energy & Chemicals (TECH) reports are available as a subscription program or on a single report basis.

Contact Details:

Americas:
Marcos Nogueira Cesar, Vice President, Global Products, E&CA: Nexant Subscriptions
Phone: +1-914-609-0324, e-mail: mcesar@nexant.com

Erica Hill, Client Services Coordinator, E&CA-Products
Phone: +1-914-609-0386, e-mail: ehill@nexant.com

EMEA:
Anna Ibbotson, Director, Nexant Subscriptions
Phone: +44-207-950-1528, aibbotson@nexant.com

Asia:
Chommanad Thammanayakatip, Managing Consultant, Energy & Chemicals Advisory
Phone: +66-2793-4606, email: chommanadt@nexant.com

Nexant, Inc. (www.nexant.com) is a leading management consultancy to the global energy, chemical, and related industries. For over 38 years, Nexant has helped clients increase business value through assistance in all aspects of business strategy, including business intelligence, project feasibility and implementation, operational improvement, portfolio planning, and growth through M&A activities. Nexant has its main offices in San Francisco (California), White Plains (New York), and London (UK), and satellite offices worldwide.
