Contents

1 Executive Summary .................................................................................................................. 1
  1.1 Overview ................................................................................................................................. 1
  1.2 Nitric Acid Technology .......................................................................................................... 1
  1.3 Strategic and Business Considerations ................................................................................. 2
  1.4 Economic Analysis ................................................................................................................. 3
  1.5 Market Analysis ..................................................................................................................... 7
    1.5.1 Commercial Applications ............................................................................................... 7
    1.5.2 Nitric Acid Producers ..................................................................................................... 8

2 Introduction ................................................................................................................................ 9
  2.1 Overview ................................................................................................................................ 9
  2.2 Value Chain ............................................................................................................................. 9
  2.3 Technology Overview .......................................................................................................... 9
    2.3.1 Weak Acid Processes ...................................................................................................... 9
    2.3.2 Concentrated Acid Processes ........................................................................................ 13
  2.4 Technology Developments .................................................................................................... 13
  2.5 Technology Holders and Licensors ...................................................................................... 13
  2.6 Strategic and Business Considerations ................................................................................. 14
  2.7 Physical and Thermodynamic Properties ............................................................................ 15
  2.8 Specifications .......................................................................................................................... 15
  2.9 Health Hazards ..................................................................................................................... 16
  2.10 Storage and Transportation ................................................................................................. 17

3 Commercial Technologies ....................................................................................................... 18
  3.1 Introduction ............................................................................................................................ 18
  3.2 Generic Technology Overview .............................................................................................. 19
    3.2.1 Mono Pressure Processes ............................................................................................... 19
    3.2.2 Dual Pressure Processes ................................................................................................. 21
    3.2.3 NOx Abatement Systems .............................................................................................. 23
    3.2.4 Concentration of Nitric Acid ......................................................................................... 25
  3.3 Casale .................................................................................................................................... 30
6 Market Analysis .................................................................................................................. 123
6.1 Commercial Applications ............................................................................................... 123
  6.1.1 Weak Nitric Acid ..................................................................................................... 123
  6.1.2 Concentrated Nitric Acid ....................................................................................... 124
6.2 Nitric Acid Producers ..................................................................................................... 124
  6.2.1 Casale ..................................................................................................................... 124
  6.2.2 ESPINDESA ............................................................................................................ 125
  6.2.3 KBR-Weatherly ...................................................................................................... 126
  6.2.4 Stamicarbon .......................................................................................................... 126
  6.2.5 Thyssenkrupp ........................................................................................................ 127
7 Glossary ................................................................................................................................ 129

Appendices
A Definitions of Capital Cost Terms Used in Process Economics ..................................... 133
B Definitions of Operating Cost Terms Used in Process Economics ................................ 138
C TECH Program Title Index (2010-2020) ....................................................................... 141
D References ......................................................................................................................... 144

TECHNOLOGY & COSTS

Technoeconomics - Energy & Chemicals (TECH)

The Nexant Subscriptions' Technoeconomics - Energy & Chemicals (TECH) program is recognized globally as the industry standard source for information relevant to the chemical process and refining industries. Technoeconomics - Energy & Chemicals (TECH) reports are available as a subscription program or on a single report basis.

Contact Details:

Americas:
Marcos Nogueira Cesar, Vice President, Global Products, E&CA: Nexant Subscriptions
Phone: + 1-914-609-0324, e-mail: mcesar@nexant.com

Erica Hill, Client Services Coordinator, E&CA-Products
Phone: + 1-914-609-0386, e-mail: ehill@nexant.com

EMEA:
Anna Ibbotson, Director, Nexant Subscriptions
Phone: +44-207-950-1528, aibbotson@nexant.com

Asia:
Chommanad Thammanayakatip, Managing Consultant, Energy & Chemicals Advisory
Phone: +66-2793-4606, email: chommanadt@nexant.com

Nexant, Inc. (www.nexant.com) is a leading management consultancy to the global energy, chemical, and related industries. For over 38 years, Nexant has helped clients increase business value through assistance in all aspects of business strategy, including business intelligence, project feasibility and implementation, operational improvement, portfolio planning, and growth through M&A activities. Nexant has its main offices in San Francisco (California), White Plains (New York), and London (UK), and satellite offices worldwide.
