Contents

1 Executive Summary .................................................................................................................. 1

1.1 Technology Overview ........................................................................................................ 3

1.1.1 Technology-based on Conventional Routes ................................................................. 3

1.1.2 Technology-based on Renewable Sources .................................................................. 5

1.2 Business Strategy Overview ............................................................................................. 7

1.3 Process Economics Overview .......................................................................................... 8

1.3.1 Product Analysis ......................................................................................................... 8

1.3.2 Regional Analysis ....................................................................................................... 10

1.3.3 Sensitivity Analysis .................................................................................................... 11

1.4 Market Overview ............................................................................................................. 13

1.4.1 Demand ....................................................................................................................... 13

1.4.2 Supply ......................................................................................................................... 14

1.4.3 Supply, Demand, and Trade ...................................................................................... 16

2 Introduction ........................................................................................................................ 18

2.1 Value Chain Overview .................................................................................................... 18

2.2 Properties ......................................................................................................................... 19

2.2.1 Physical Properties .................................................................................................... 22

2.3 Polyurethane Overview .................................................................................................. 24

2.4 Bio Polyols ....................................................................................................................... 26

2.5 Industry Structure .......................................................................................................... 27

2.6 Technology Holders/Licensors ..................................................................................... 28

2.7 Strategic Business Considerations .................................................................................. 29

3 Technologies Based on Conventional Routes ..................................................................... 31

3.1 Difunctional Polyols – Polypropylene Glycols .............................................................. 31

3.1.1 Process Chemistry .................................................................................................... 31

3.1.2 Process Description .................................................................................................. 33

3.2 Higher-Functional Polyols ............................................................................................. 36

3.2.1 Trifunctional Polyols ............................................................................................... 37

3.2.2 Polyols with Functionality Greater than Three ......................................................... 39

TECHNOLOGY & COSTS

Technoeconomics - Energy & Chemicals (TECH)

The NexantECA Subscriptions' Technoeconomics - Energy & Chemicals (TECH) program is recognized globally as the industry standard source for information relevant to the chemical process and refining industries. Technoeconomics - Energy & Chemicals (TECH) reports are available as a subscription program or on a single report basis.

Contact Details:

Americas:
Marcos Nogueira Cesar, Vice President, Global Products, E&CA: NexantECA Subscriptions
Phone: +1-914-609-0324, e-mail: mcesar@nexant.com

Erica Hill, Client Services Coordinator, ECA-Products
Phone: +1-914-609-0386, e-mail: ehill@nexant.com

EMEA:
Anna Ibbotson, Director, NexantECA Subscriptions
Phone: +44-207-950-1528, aibbotson@nexant.com

Asia:
Chommanad Thammanayakatip, Managing Consultant, Energy & Chemicals Advisory
Phone: +66-2793-4606, email: chommanadt@nexant.com

NexantECA Americas, LLC. (www.nexantECA.com) is a leading management consultancy to the global energy, chemical, and related industries. For over 38 years, NexantECA has helped clients increase business value through assistance in all aspects of business strategy, including business intelligence, project feasibility and implementation, operational improvement, portfolio planning, and growth through M&A activities. NexantECA has its main offices in San Francisco (California), White Plains (New York), and London (UK), and satellite offices worldwide.
