## Contents

|       |  |    |
|-------|--|----|
| 1     | Executive Summary .....  | 1  |
| 1.1   | Overview.....  | 1  |
| 1.2   | Next Generation Ethanol.....   | 2  |
| 1.3   | Economics .....  | 4  |
| 1.4   | Capacity Analysis .....  | 5  |
| 1.5   | Implications for Conventional Technology .....                           | 6  |
| 1.5.1 | Strategic Implications .....   | 6  |
| 1.5.2 | Prices and Margins.....  | 7  |
| 2     | Introduction.....  | 8  |
| 2.1   | Overview.....  | 8  |
| 2.1.1 | Drivers for the Commercialization of Next Generation Ethanol .....       | 9  |
| 2.2   | Background to Ethanol Production.....                                    | 11 |
| 2.2.1 | Fossil Ethanol.....  | 11 |
| 2.2.2 | Fermentative Bioethanol .....  | 12 |
| 2.2.3 | Bio-refining and Cellulosic Sugars .....                                 | 16 |
| 2.2.4 | Non-Fermentative Bioethanol Production .....                             | 20 |
| 3     | Technology.....  | 21 |
| 3.1   | First-Generation Ethanol .....   | 21 |
| 3.1.1 | Corn.....  | 21 |
| 3.1.2 | Sugarcane .....  | 36 |
| 3.1.3 | Minor Feedstocks .....   | 40 |
| 3.1.4 | Sustainability Developments in First-Generation Ethanol Production ..... | 40 |
| 3.2   | Bolt-On Technologies or 1.5 Generation Technologies .....                | 41 |
| 3.2.1 | ICM.....   | 41 |
| 3.2.2 | D3MAX .....  | 42 |
| 3.2.3 | Edeniq .....   | 44 |
| 3.3   | Next Generation Ethanol.....   | 44 |
| 3.3.1 | Hydrolysis and Fermentation .....  | 44 |
| 3.3.2 | Syngas Fermentation .....  | 65 |

|                   |   |   |     |
|-------------------|---|---|-----|
|                   | 3.3.3   | Gasification and Syngas Reforming .....             | 73  |
| 4                 | Economics .....                               |   | 79  |
|                   | 4.1   | Methodology .....                                   | 79  |
|                   | 4.1.1   | Capital Cost Elements .....                         | 79  |
|                   | 4.1.2   | Operating Cost Elements .....                       | 82  |
|                   | 4.2   | Feedstock Supply and Logistics .....                | 86  |
|                   | 4.2.1   | Fermentation Feedstocks .....                       | 86  |
|                   | 4.2.2   | Hydrolysis Feedstock .....                          | 86  |
|                   | 4.2.3   | Syngas Fermentation Feedstock .....                 | 86  |
|                   | 4.3   | Comparative Economics .....                         | 87  |
|                   | 4.3.1   | Comparison by Region .....                          | 87  |
|                   | 4.3.2   | Comparison by Process .....                         | 91  |
|                   | 4.4   | Sensitivity Analysis .....                          | 96  |
|                   | 4.4.1   | Primary Feedstock Sensitivity .....                 | 96  |
|                   | 4.4.2   | CAPEX Sensitivity .....                             | 97  |
|                   | 4.4.3   | Economy of Scale Sensitivity .....                  | 97  |
| 5                 | Capacity Analysis .....                       |   | 98  |
|                   | 5.1   | Overview .....                                      | 98  |
|                   | 5.2   | Existing Capacity .....                             | 98  |
|                   | 5.2.1   | Existing First-Generation Ethanol Capacity .....    | 98  |
|                   | 5.2.2   | Existing Second-Generation Ethanol Capacity .....   | 105 |
|                   | 5.3   | Project Capacity Analysis .....                     | 108 |
|                   | 5.3.1   | Methodology for Evaluating Announced Projects ..... | 108 |
|                   | 5.3.2   | Announced Ethanol Capacity .....                    | 111 |
|                   | 5.4   | Conclusions .....                                   | 120 |
| 6                 | Implications on Conventional Technology ..... |   | 122 |
|                   | 6.1   | Strategic Implications .....                        | 122 |
|                   | 6.1.1   | Market Implications .....                           | 122 |
|                   | 6.1.2   | Technical Implications .....                        | 124 |
|                   | 6.2   | Prices and Margins .....                            | 125 |
|                   | 6.2.1   | Prices .....  | 125 |
|                   | 6.2.2   | Margins .....                                       | 126 |
| <b>Appendices</b> |   |   |     |
| A                 | References .....                              |   | 128 |

## Figures

|           |   |    |
|-----------|---|----|
| Figure 1  | Ethanol Value Chain .....   | 2  |
| Figure 2  | Ethanol Regional Cost Competitiveness Estimates .....                       | 4  |
| Figure 3  | Global Second-Generation Ethanol Capacity, 2019.....                        | 5  |
| Figure 4  | Global Ethanol Demand by Application .....                                  | 6  |
| Figure 5  | Ethanol Value Chain .....   | 8  |
| Figure 6  | Ribbon Representation of Cellulase Enzyme .....                             | 18 |
| Figure 7  | Global Corn Production, 2019 .....  | 21 |
| Figure 8  | Wet Milling versus Dry Milling Process Flow .....                           | 22 |
| Figure 9  | Corn Milling and Hydrolysis .....   | 24 |
| Figure 10 | Saccharification .....  | 25 |
| Figure 11 | Fermentation.....   | 26 |
| Figure 12 | Ethanol Beer Still .....  | 27 |
| Figure 13 | Ethanol Rectifier and Dehydration.....                                      | 28 |
| Figure 14 | DDGS Drying.....  | 29 |
| Figure 15 | Flow Diagram of Cane Milling Process for Ethanol and Sugar Production ..... | 38 |
| Figure 16 | Block Flow Diagram of Ethanol Production from Sugarcane .....               | 39 |
| Figure 17 | ICM Technologies Process Flow Diagram .....                                 | 42 |
| Figure 18 | D3MAX Technology.....   | 43 |
| Figure 19 | Beta Renewables PROESA Technology.....                                      | 45 |
| Figure 20 | Inbicon's IBUS Process for Biomass to Ethanol.....                          | 49 |
| Figure 21 | logen's Cellulose Ethanol Process .....                                     | 51 |
| Figure 22 | SUNLIQUID® Process of Clariant.....   | 53 |
| Figure 23 | Chempolis' FormicoBio™ Process .....  | 56 |
| Figure 24 | DuPont Cellulosic Ethanol Process Flow .....                                | 59 |
| Figure 25 | LanzaTech Block Flow Diagram.....   | 66 |

## TECHNOLOGY & COSTS

# Biorenewable Insights

The NexantECA Subscriptions' Biorenewable Insights program is recognized globally as the industry standard source for information relevant to the chemical process and refining industries. Biorenewable Insights reports are available as a subscription program or on a single report basis.

### Contact Details:

#### Americas:

Marcos Nogueira Cesar, Vice President, Global Products, E&CA: NexantECA Subscriptions  
Phone: + 1-914-609-0324, e-mail: mcesar@nexantECA.com

Erica Hill, Client Services Coordinator, E&CA-Products  
Phone: + 1-914-609-0386, e-mail: ehill@nexantECA.com

#### EMEA:

Anna Ibbotson, Director, NexantECA Subscriptions  
Phone: +44-207-950-1528, aibbotson@nexantECA.com

#### Asia:

Chommanad Thammanayakatip, Managing Consultant, Energy & Chemicals Advisory  
Phone: +66-2793-4606, email: chommanadt@nexantECA.com

NexantECA ([www.nexantECA.com](http://www.nexantECA.com)) is a leading management consultancy to the global energy, chemical, and related industries. For over 38 years, NexantECA has helped clients increase business value through assistance in all aspects of business strategy, including business intelligence, project feasibility and implementation, operational improvement, portfolio planning, and growth through M&A activities. NexantECA has its main offices in White Plains (New York), and London (UK), and satellite offices worldwide.
