Contents

1	Executive Summary	1
1.1	Overview.....	1
1.2	Focus of this Report	2
1.3	Other Renewable Power Technologies.....	2
1.4	Introduction.....	2
1.5	Definitive Pathways	3
1.6	Technologies and Applications	5
1.7	Market Scenario, Trends, and Opportunities	6
1.8	Costs and Techno-Economics	7
1.9	Case Studies	10
1.10	Conclusion.....	12
2	Introduction.....	13
2.1	Objective.....	13
2.1.1	Structure of Report	15
2.1.2	Approach and Methodology	16
2.2	Paradigm Shift in Real Time.....	17
2.2.1	Key Drivers and Fundamentals	18
2.2.2	Main Renewable Power Sources	19
2.2.3	Role of Energy Storage	20
2.3	Establishing a Business Case for Renewable Power	21
2.4	Undertaking Specific Large-Scale Renewable Power Projects	22
2.4.1	Module 1 – Strategy and Plan for Development	23
2.4.2	Module 2 - Review of Definitive Pathways	23
2.4.3	Module 3 - Competitor Assessment	23
2.4.4	Module 4 - Detailed Technology Screening	23
2.4.5	Module 5 – Integration of Energy Storage	24
2.4.6	Module 6 - Specific Project Evaluations.....	25
2.4.7	Likely Impact of COVID-19.....	26
2.5	Conclusions.....	26
3	Definitive Pathways	28
3.1	Emphasis on Sustainable Energy	28
3.2	Blueprint for Definitive Pathways	28
3.3	Power Generation Duty and Service	29
3.3.1	Baseload Mode	29
3.3.2	Cycling Mode.....	29

3.3.3	Peaking Mode	30
3.4	Renewable Power Supply/Value Chain	30
3.4.1	Overview	30
3.4.2	Integrated Renewable Power Assessment	31
3.5	Power System Requirements.....	35
3.6	Integrating Energy Storage	38
3.6.1	Energy and Power versus Time Duration Requirements.....	38
3.6.2	Matching Power System Requirements to Technologies	38
3.6.3	Classification of Energy Storage	39
3.6.4	Performance Criteria Integrating Energy Storage.....	41
3.6.5	Recent Reports Related to Energy Storage.....	42
3.7	“Across-the-Meter” End-Use Applications.....	42
3.8	Lessons Learned.....	44
3.8.1	Existing Renewable Power Generation Assets.....	44
3.8.2	Feasibility Studies	46
3.9	Recommended Roadmap for Renewable Power.....	48
3.9.1	Step 1: Overview of Large-Scale Renewable Power Plant/Facility	49
3.9.2	Step 2: Determine Large-Scale Renewable Power Opportunities.....	50
3.9.3	Step 3: Selection of Most Viable Technology and Techno-Economic Feasibility	51
3.10	Conclusions.....	51
4	Technologies and Applications.....	53
4.1	Overarching Factors for Sustainable Energy	53
4.2	Key Renewable Power Technologies	53
4.3	Solar PV	53
4.3.1	Solar PV Technology.....	54
4.3.2	Solar PV Value Chain.....	54
4.3.3	Solar PV Performance and Efficiency	55
4.3.4	Conversion Efficiency.....	56
4.3.5	Solar PV System Design and Integration.....	56
4.3.6	Large-Scale Solar PV Power Generation Projects	58
4.4	Wind.....	58
4.4.1	Wind Turbine Technology	58
4.4.2	Type of Wind Turbines	59
4.4.3	Wind Turbines Applications.....	60
4.4.4	Large-Scale Wind Power Generation Projects	63
4.5	Large-Scale Solar PV, Wind, and BESS Projects.....	63
4.5.1	System Design and Integration	63
4.5.2	Major Emphasis during Project Development and Execution Phases.....	64
4.5.3	Key Renewable Power Project Phases and Required Analysis	65
4.6	Other Renewable Power Technologies.....	65
4.6.1	CSP	65
4.6.2	Biomass.....	67
4.6.3	Hydro	68
4.6.4	Geothermal.....	69
4.6.5	Other Technologies	71
4.7	Technologies and Applications Driven by Markets	71
4.7.1	Utilities as Power Aggregator.....	71
4.7.2	Impact of LACE on Renewable Power Technologies & Applications	72
4.8	Conclusions.....	73

5	Market Scenario, Trends, and Opportunities	75
5.1	Decarbonizing the Global Energy System	75
5.1.1	Overview	75
5.1.2	Renewables Penetration, Declining Costs, and Energy Storage.....	75
5.1.3	Major Role for Solar PV, Wind, and BESS	76
5.1.4	Main Obstacles.....	77
5.2	Historical and Current Trends	77
5.2.1	Key Global Highlights	77
5.2.2	Global Renewable Power Mix	77
5.2.3	Global Annual Renewable Power Growth.....	78
5.2.4	Global Renewable Power Generation by Region	79
5.2.5	Global Renewable Power Generation Share	79
5.2.6	2019 and Pre COVID-19	79
5.3	Impact of COVID-19.....	80
5.3.1	Overview	80
5.3.2	Comparison of 2019 versus 2020	80
5.3.3	Global Impact on Regions	81
5.3.4	Likely Estimates for 2020 (and near-term).....	81
5.3.5	Large-Scale Solar PV Continue to Lead	81
5.4	Renewable Power Industry Segmentation	83
5.4.1	Solar PV	83
5.5	Conclusions.....	91
6	Costs and Techno-Economics	92
6.1	The Meaning of These Analyses.....	92
6.1.1	Overview	92
6.1.2	Paradigm Shift in Methodologies and Metrics.....	92
6.2	The “Black Box”	93
6.2.1	Process Plants and Facilities	93
6.2.2	Large-Scale Renewable Power Integrated with Energy Storage Projects.....	93
6.3	Cost Metrics	93
6.3.1	Cost per kW.....	94
6.3.2	Cost per kWh.....	95
6.4	Levelized Cost of Electricity and Levelized Cost of Storage	95
6.4.1	LCOE.....	95
6.4.2	LCOS.....	97
6.4.3	LCOE and LCOS Driven by End-Use Applications	98
6.5	CREST Model for Renewable Power.....	100
6.5.1	Overview	100
6.5.2	Calculation of COE and LCOE	101
6.5.3	CREST Model Design and Features	101
6.5.4	Capital Structuring.....	102
6.5.5	CREST Model Outputs.....	102
6.6	CREST Model for Solar.....	104
6.6.1	Technology Choices.....	104
6.6.2	Solar Specific Capital Cost Inputs	104
6.6.3	Inputs to CREST Model for Solar	104
6.6.4	Specific Inputs & Range of Potential Values.....	104
6.6.5	Cash Flow Analysis	107
6.7	CREST Model & Analysis for Wind	109

	6.7.1	Wind-Specific Capital Cost Inputs	109
	6.7.2	Specific Inputs & Range of Potential Values	109
	6.7.3	Cash Flow Analysis	111
6.8		CREST Model and Analysis for Geothermal	113
	6.8.1	Geothermal-Specific Project Performance Inputs	113
	6.8.2	Geothermal Specific Capital Cost Inputs	114
	6.8.3	Geothermal-Specific O&M Cost Inputs	115
	6.8.4	Specific Inputs & Range of Potential Values	115
	6.8.5	Cash Flow Analysis	118
6.9		Comparison of Renewable Power Generation	121
	6.9.1	Net Installed Cost (TIC less Grants)	121
	6.9.2	Net Nominal LCOE	121
6.10		Model for Energy Storage via BESS	122
	6.10.1	Overview	122
	6.10.2	Detailed Total Installed Cost	122
6.11		Conclusions	124
7		Case Studies	125
	7.1	Introduction	125
	7.2	NexantECA Case Study 1: Zhenjiang Rooftop Solar PV Facilities	125
	7.2.1	Overview	125
	7.2.2	Site and Location	125
	7.2.3	Major System Assessment	126
	7.2.4	Operations and Maintenance	132
	7.2.5	Operations	132
	7.2.6	Maintenance	132
	7.2.7	Risks and Mitigation Assessment	133
	7.2.8	Key Conclusions	134
	7.3	NexantECA Case Study 2: Ningwu Wind Power Facilities	134
	7.3.1	Overview	134
	7.3.2	Site and Location	135
	7.3.3	Major Systems Assessment	135
	7.3.4	Performance	138
	7.3.5	Operations and Maintenance	140
	7.3.6	Risks and Mitigation Assessment	142
	7.3.7	Key Conclusions	142
	7.4	NexantECA Case Study 3: Dangshan Biomass Power Generation Project	143
	7.4.1	Overview	143
	7.4.2	Site and Location	143
	7.4.3	Major System Assessment	144
	7.4.4	Biomass Quality	145
	7.4.5	Biomass Fuel Handling	146
	7.4.6	Boiler	147
	7.4.7	Grates	148
	7.4.8	Steam Turbine	148
	7.4.9	Generator	149
	7.4.10	Flue Gas Treatment	149
	7.4.11	Ash Handling	150
	7.4.12	Electrical Installation and Connection	150
	7.4.13	Civil and Structural	151

7.4.14	Performance	151
7.4.15	Operations and Maintenance	154
7.4.16	Risk and Maintenance Assessment	156
7.4.17	Key Conclusions.....	156
7.5	NexantUSS Case Study 1: Solar PV plus Energy Storage – Campus	157
7.5.1	Overview	157
7.5.2	Feasibility Results	159
7.5.3	Current Electricity Billing Based on Grid Supply	161
7.5.4	New Electricity Billing via Solar PV plus Energy Storage	161
7.5.5	Operational Breakdown.....	163
7.5.6	Cash Flow Analysis	164
7.5.7	Main Advantages.....	164
7.6	NexantUSS Case Study 2: Solar PV plus Energy Storage - Utility.....	165
7.6.1	Overview	165
7.6.2	Feasibility Results	167
7.6.3	Detailed Operations and Forecasted Revenue	168
7.6.4	Cash Flow Analysis	171
7.7	Industry-Wide Case Studies.....	172
7.7.1	Industry Case Study 1: Solana Solar Generating Plant	173
7.7.2	Industry Case Study 2: Crescent Dunes Solar Energy Project.....	174
7.7.3	Industry Case Study 3: Solar PV/Wind plus Energy Storage at Lausanne Polytechnic School	175
7.7.4	Industry Case Study 4: Solar PV plus Energy Storage at Flathead Electric ViZn Z20	176
7.7.5	Industry Case Study 5: Solar PV plus Energy Storage at BlueSky Energy Microgrid ViZn Z20	177
7.7.6	Industry Case Study 6: Community Solar PV plus Energy Storage at Ergon Energy	178
7.7.7	Industry Case Study 7: Solar PV plus Energy Storage Minami Hayakita Substation Hokkaido Electric Power	179
7.7.8	Industry Case Study 8: Solar PV plus Energy Storage at Imergy Trojane Project	180
7.7.9	Industry Case Study 9: Solar PV/Wind plus Energy Storage at Ontario IESO	181
7.8	Conclusions.....	182

Appendices

A	Glossary	184
B	References	186

TECHNOLOGY & COSTS

Biorenewable Insights

The NexantECA Subscriptions' Biorenewable Insights program is recognized globally as the industry standard source for information relevant to the chemical process and refining industries. Biorenewable Insights reports are available as a subscription program or on a single report basis.

Contact Details:

Americas:

Marcos Nogueira Cesar, Vice President, Global Products, E&CA: NexantECA Subscriptions
Phone: + 1-914-609-0324, e-mail: mcesar@nexantECA.com

Erica Hill, Client Services Coordinator, E&CA-Products
Phone: + 1-914-609-0386, e-mail: ehill@nexantECA.com

EMEA:

Anna Ibbotson, Director, NexantECA Subscriptions
Phone: +44-207-950-1528, aibbotson@nexantECA.com

Asia:

Chommanad Thammanayakatip, Managing Consultant, Energy & Chemicals Advisory
Phone: +66-2793-4606, email: chommanadt@nexantECA.com

NexantECA (www.nexantECA.com) is a leading management consultancy to the global energy, chemical, and related industries. For over 38 years, NexantECA has helped clients increase business value through assistance in all aspects of business strategy, including business intelligence, project feasibility and implementation, operational improvement, portfolio planning, and growth through M&A activities. NexantECA has its main offices in White Plains (New York), and London (UK), and satellite offices worldwide.
