

**TECHNOLOGY & COSTS****Biorenewable Insights****Cellulosic Feedstocks**

## Table of Contents

A Report by **NexantECA**, the Energy and Chemical Advisory company

Published Date: November 2021

[www.nexanteca.com/subscriptions-and-reports](http://www.nexanteca.com/subscriptions-and-reports)**Contents**

1	Executive Summary .....	1
1.1	Overview.....	1
1.2	Introduction.....	2
1.3	Feedstocks .....	3
1.4	Economics.....	5
1.5	Capacity.....	6
1.6	Implications .....	7
1.6.1	Scale.....	7
1.6.2	Price .....	7
1.6.3	Carbon Intensity .....	8
2	Introduction.....	9
2.1	Overview.....	9
2.2	Biomass Processing Summary .....	10
2.3	The Food Versus Fuel Debate .....	10
3	Feedstocks .....	12
3.1	Biomass Feedstocks .....	12
3.1.1	Chemical Structure.....	14
3.1.2	Physical Structure and Variance Among Sources .....	18
3.1.3	Biomass Feedstock Types .....	21
3.2	Grasses as Biomass Feedstocks.....	21
3.2.1	Switchgrass/Miscanthus.....	21
3.2.2	Energy Cane .....	28
3.3	Agricultural Residues .....	30
3.4	Wood and Wood Wastes.....	36
3.4.1	Poplar .....	36
3.4.2	Willow .....	37
3.4.3	Wood Wastes .....	39
3.5	Milling Wastes .....	46
3.5.1	Sugarcane Bagasse and Field Trash.....	46
3.5.2	Palm EFB (Empty Fruit Bunches) .....	51
3.5.3	Pulp and Paper Wastes .....	53

3.6	Other Wastes .....	56
3.6.1	Animal Waste and Manure .....	56
3.6.2	MSW.....	56
4	Economics .....	59
4.1	Competitive Economics .....	60
4.2	North America .....	61
4.2.1	Switchgrass .....	61
4.2.2	Hybrid Poplar.....	62
4.2.3	Corn Stover .....	64
4.3	South America .....	65
4.3.1	Sugarcane Trash (Collection) .....	65
4.3.2	Energy Cane (Mechanical Harvesting) .....	66
4.4	Europe.....	67
4.4.1	Wheat Straw (Collection) .....	67
4.4.2	Miscanthus .....	68
4.5	Asia.....	69
4.5.1	Rice Straw .....	69
4.5.2	Empty Fruit Bunches (EFB) .....	70
5	Capacity.....	72
5.1	Global Capacity .....	73
5.1.1	Global Overview .....	73
5.1.2	Corn Stover .....	74
5.1.3	Wheat Straw .....	74
5.1.4	Sorghum.....	75
5.1.5	Barley .....	75
5.1.6	Rice Straw .....	76
5.1.7	Soy Residues .....	76
5.1.8	EFBs.....	77
5.1.9	Other Oilseed Residues .....	77
5.1.10	Sugarcane Wastes .....	78
5.2	North American Capacity .....	80
5.2.1	North American Totals.....	80
5.2.2	By Country.....	81
5.3	Central and South American Capacity .....	83
5.3.1	Central and South American Totals .....	83
5.3.2	By Country.....	84
5.4	European Capacity .....	86
5.4.1	European Totals .....	86
5.4.2	By Country.....	87
5.5	Asian Capacity .....	89
5.5.1	Asian Totals.....	89
5.5.2	By Country.....	90
5.6	Rest of World (ROW) .....	92
6	Impacts on the Conventional Industry .....	93
6.1	Comparisons of Scale with Petrochemicals and Fossil Fuels Feedstocks .....	93

6.2	Comparisons of Price with Petrochemicals and Fossil Fuels .....	94
6.3	Carbon Intensity .....	95
6.3.1	Carbon Intensity of Biomass Feedstocks .....	95
6.3.2	Carbon Intensity of Biomass Ethanol and Liquid Fuels .....	95
6.3.3	Carbon Intensity of Electricity Production .....	97

## Appendices

A	References .....	99
---	------------------	----

## Figures

Figure 1	GHG Reductions Possible Through Feedstock Selection.....	2
Figure 2	Biomass Comparative Economics, as Produced .....	5
Figure 3	Global Available Cellulosic Biofeedstocks by Type.....	6
Figure 4	Global Available Cellulosic Biofeedstocks by Region .....	6
Figure 5	Price Comparison of Biomass with Fossil Fuel Feedstocks.....	7
Figure 6	GHG Reductions Possible Through Feedstock Selection.....	9
Figure 7	Development of Biofuel Generation.....	14
Figure 8	Conceptual Structure of Cellulose in Plants .....	18
Figure 9	Map of Annual Switchgrass Yields, as of 2009 .....	22
Figure 10	USDA Hardiness Zone Map .....	27
Figure 11	Composition Variation for Sugarcane and Type 1 and Type 2 Energy Cane .....	28
Figure 12	U.S. Regional Production of Corn Stover, County-level.....	31
Figure 13	Geographic Distribution of Biomass in China .....	32
Figure 14	United States Forest Resources by Type.....	39
Figure 15	Schematic of Biomass Sources from Industrial Forestry .....	40
Figure 16	Breakdown of U.S. Forest Resources by Production Volume .....	41
Figure 17	United States Regional Distribution of Forestry Residues .....	43
Figure 18	United States Logging Residues .....	43
Figure 19	United States Slash Residues .....	44
Figure 20	United States Lumber Mill Residue .....	44
Figure 21	United States Regional Distribution of Urban Wood Wastes .....	45
Figure 22	Brazil and India Sugarcane Production .....	47
Figure 23	Brazilian Sugarcane Field Trash Burning .....	49
Figure 24	Production from a Palm Oil Mill .....	51
Figure 25	Pulp and Paper Solid, Liquid, and Gaseous Wastes.....	54
Figure 26	World Map indicating Major Forests .....	55
Figure 27	Trade of Paper and Paper Products.....	55
Figure 28	Inputs and Outputs of Waste Management Process.....	58

Figure 53	European Available Cellulosic Biofeedstocks by Type.....	86
Figure 54	European Available Cellulosic Biofeedstocks by Country/Region .....	86
Figure 55	European Union Available Cellulosic Biofeedstocks by Type .....	87
Figure 56	Ukrainian Available Cellulosic Biofeedstocks by Type .....	87
Figure 57	Other European Available Cellulosic Biofeedstocks by Type .....	88
Figure 58	Asian Available Cellulosic Biofeedstocks by Type .....	89
Figure 59	Asian Available Cellulosic Biofeedstocks by Country.....	89
Figure 60	China Available Cellulosic Biofeedstocks by Type .....	90
Figure 61	Indian Available Cellulosic Biofeedstocks by Type .....	90
Figure 62	Other Asian Available Cellulosic Biofeedstocks by Type .....	91
Figure 63	ROW Available Cellulosic Biofeedstocks by Type .....	92
Figure 64	Price Comparison of Biomass with Fossil Fuel Feedstocks.....	94
Figure 65	California LCFS Ethanol Credits per Gallon at Different CIs.....	96
Figure 66	Comparison of Existing Biofuels Carbon Intensity from Different Feedstocks .....	96
Figure 67	Carbon Intensity Comparison for Electric Power Generation.....	97

**Tables**

Table 1	Potential Biomass Feedstocks .....	4
Table 2	Next Generation Biomass Comparative Economics .....	5
Table 3	Comparison of Cellulosic Feedstocks with Global Fossil Energy Resources, 2019-2020 .....	7
Table 4	Carbon Intensities of Cellulosic Biomass Compared to Conventional Crops .....	8
Table 5	Potential Products from Key 2G Biomass Processing Technologies .....	10
Table 6	Average Lignin, Cellulose and Hemicellulose Content for Biomass Feedstocks, Dry Basis .....	15
Table 7	Monomeric Components of Cellulose and Hemicellulose .....	16
Table 8	Potential Biomass Feedstocks .....	21
Table 9	SWOT Analysis of Grasses as a Biomass Feedstock for Biofuel Production .....	23
Table 10	Top Five Corn (Maize) Producing Countries in the World, 2021/2022.....	33
Table 11	Composition of Wheat Straw .....	33
Table 12	Top Five Wheat/Wheat Straw Producing Countries in the World, 2021/2022 .....	34
Table 13	Nutritive Content of Rice Straw .....	35
Table 14	Top Five Rice/Rice Straw Producing Countries in the World, 2021/2022.....	36
Table 15	SWOT Analysis of Trees as a Biomass Feedstock for Biofuel Production .....	40
Table 16	Top Five Sugarcane, Bagasse, and Field Trash Producing Countries in the World, 2021/2022.....	48
Table 17	Top Palm and EFB Producing Countries in the World, 2011/2012 .....	52
Table 18	Waste Types and Typical Components.....	57
Table 19	Selected Regional Biofeedstocks Assessed .....	59
Table 20	Next Generation Biomass Comparative Economics .....	60
Table 21	Cost of Production Estimate for: Switchgrass (15 % Moisture) Process: Clean Air .....	61
Table 22	Hybrid Poplar: Plantation Founding Model.....	62
Table 23	Hybrid Poplar: Existing Forest Model .....	62
Table 24	Cost of Production Estimate for: Hybrid Poplar (50 % Moisture) Process: Unspecified Product .....	63
Table 25	Cost of Production: Corn Stover (15 % Moisture) Process: Unspecified Product .....	64
Table 26	Cost of Production Estimate for: Sugarcane Trash Process: Unspecified Product .....	65
Table 27	Cost of Production: Energy Cane by Mechanical Harvesting (15 % Moisture) Process: Clean Air .....	66
Table 28	Cost of Production: Wheat Straw Collection (15 % Moisture) Process: Unspecified Product .....	67
Table 29	Cost of Production: Miscanthus (15 % Moisture) Process: Clean Air .....	68
Table 30	Cost of Production: Rice Straw, China (15 % Moisture) Process: Clean Air .....	69
Table 31	Cost of Production: EFBs, Malaysia (50 % Moisture) Process: Unspecified Product .....	71
Table 32	Comparison of Cellulosic Feedstocks with Global Fossil Energy Resources, 2019-2020 .....	93
Table 33	Carbon Intensities of Cellulosic Biomass Compared to Conventional Crops .....	95
Table 34	Carbon Intensity of Ethanol from Different Feedstocks Compared to Gasoline .....	95

## TECHNOLOGY & COSTS

# Biorenewable Insights

The NexantECA Subscriptions' Biorenewable Insights program is recognized globally as the industry standard source for information relevant to the chemical process and refining industries. Biorenewable Insights reports are available as a subscription program or on a single report basis.

### Contact Details:

#### Americas:

Marcos Nogueira Cesar, Vice President, Global Subscriptions and Reports  
Phone: + 1-914-609-0324, e-mail: mcesar@NexantECA.com

Erica Hill, Client Services Coordinator, Subscriptions and Reports  
Phone: + 1-914-609-0386, e-mail: ehill@NexantECA.com

#### EMEA:

Anna Ibbotson, Vice President, Sales and Marketing  
Phone: +44-207-950-1528, aibbotson@NexantECA.com

#### Asia:

Chommanad Thammanayakatip, Managing Consultant  
Phone: +66-2793-4606, email: chommanadt@NexantECA.com

NexantECA Subscriptions and Reports provide clients with comprehensive analytics, forecasts and insights for the chemicals, polymers, energy and cleantech industries. Using a combination of business and technical expertise, with deep and broad understanding of markets, technologies and economics, NexantECA provides solutions that our clients have relied upon for over 50 years.
