

The **Technoeconomics - Energy & Chemicals (TECH)** program is globally recognized as the standard source of process evaluations of existing, new and emerging technologies of interest to the chemical and energy industries.

An annual subscription to the 2024 TECH program includes 20 reports covering the topics listed below.

Petrochemical Updates

- Ammonia
- Acrylic Acid and Esters
- Hydrogen Peroxide
- Linear Alpha Olefins
- LLDPE
- Polycarbonate
- Urea
- Xylenes

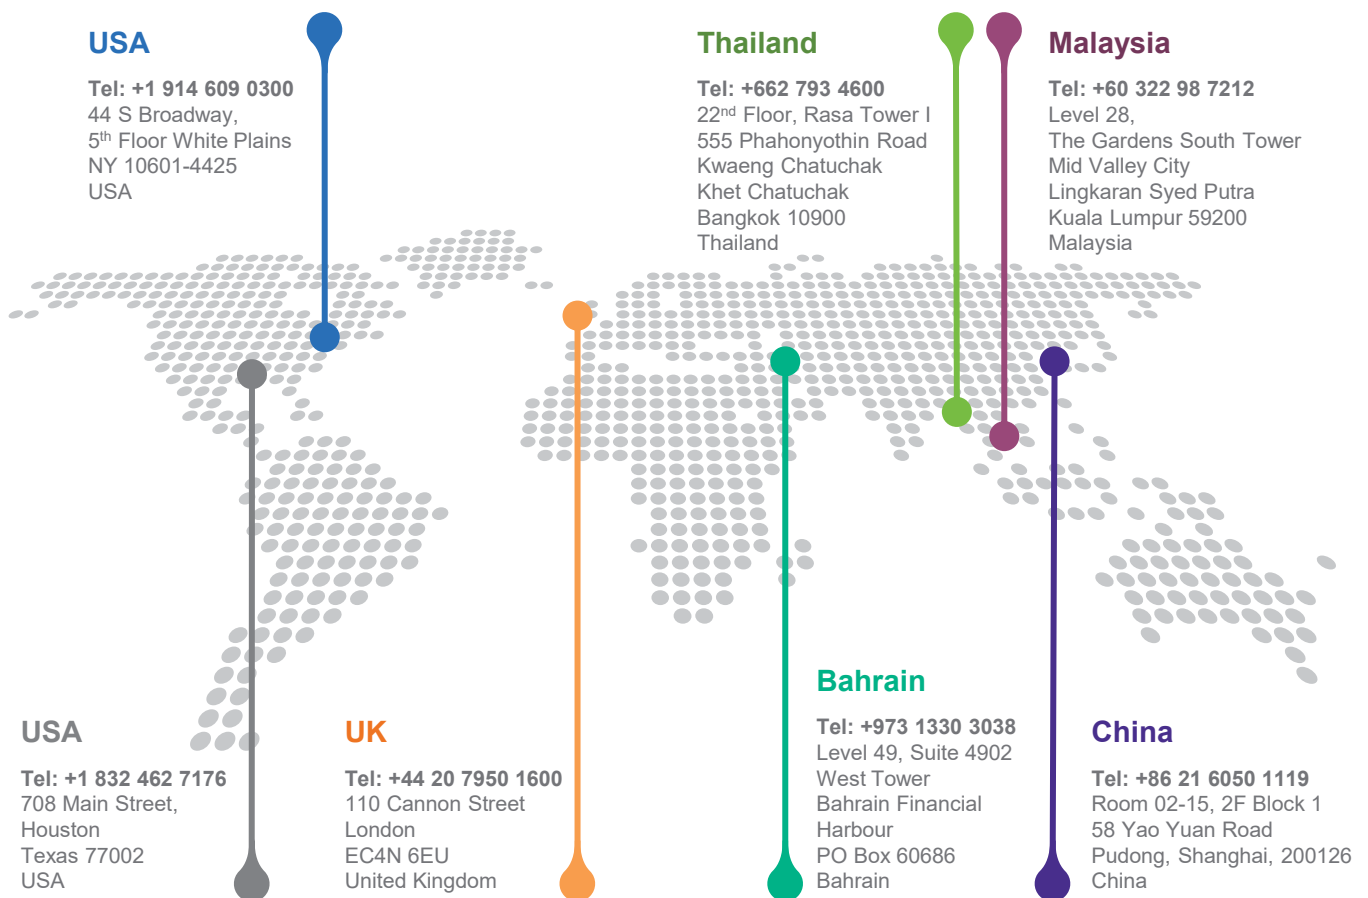

Special Topics

- Advances in Battery Energy Storage Systems
- Decarbonizing Portland Cement
- Detergent Alcohols
- Gas Flaring Alternatives
- Green Steel
- Key Pathways for Red, Purple, and Pink Hydrogen
- Liquid Organic Hydrogen Carriers
- Oleochemicals
- PMMA
- PTMEG/Spandex
- Processing Challenges of Renewable Feedstocks
- Specialty LDPE Copolymer Developments

NexantECA partners with clients to help them navigate the big global energy, chemicals and materials issues of tomorrow. We provide independent advice through our consulting, subscriptions and reports, and training businesses using expertise developed in markets, economics and technology through our fifty years of operation. We are entirely dedicated to supporting sustainable development of the industry and provide expert advice with efficiency, speed, and agility.
