

NexantECA'S subscription program, **Biorenewable Insight (BI)**, provides in-depth evaluations and reliable data on the technology, cost competitiveness and business developments of biorenewable chemicals and fuels. BI was created in response to the increasing activity entrances and exits of players, emergence and commercialization of new technologies, feedstocks, product types, as well as growing interest from companies in the oil, chemical, financial and other sectors.

An annual subscription to the 2023 BI program includes 10 reports covering the topics listed below.

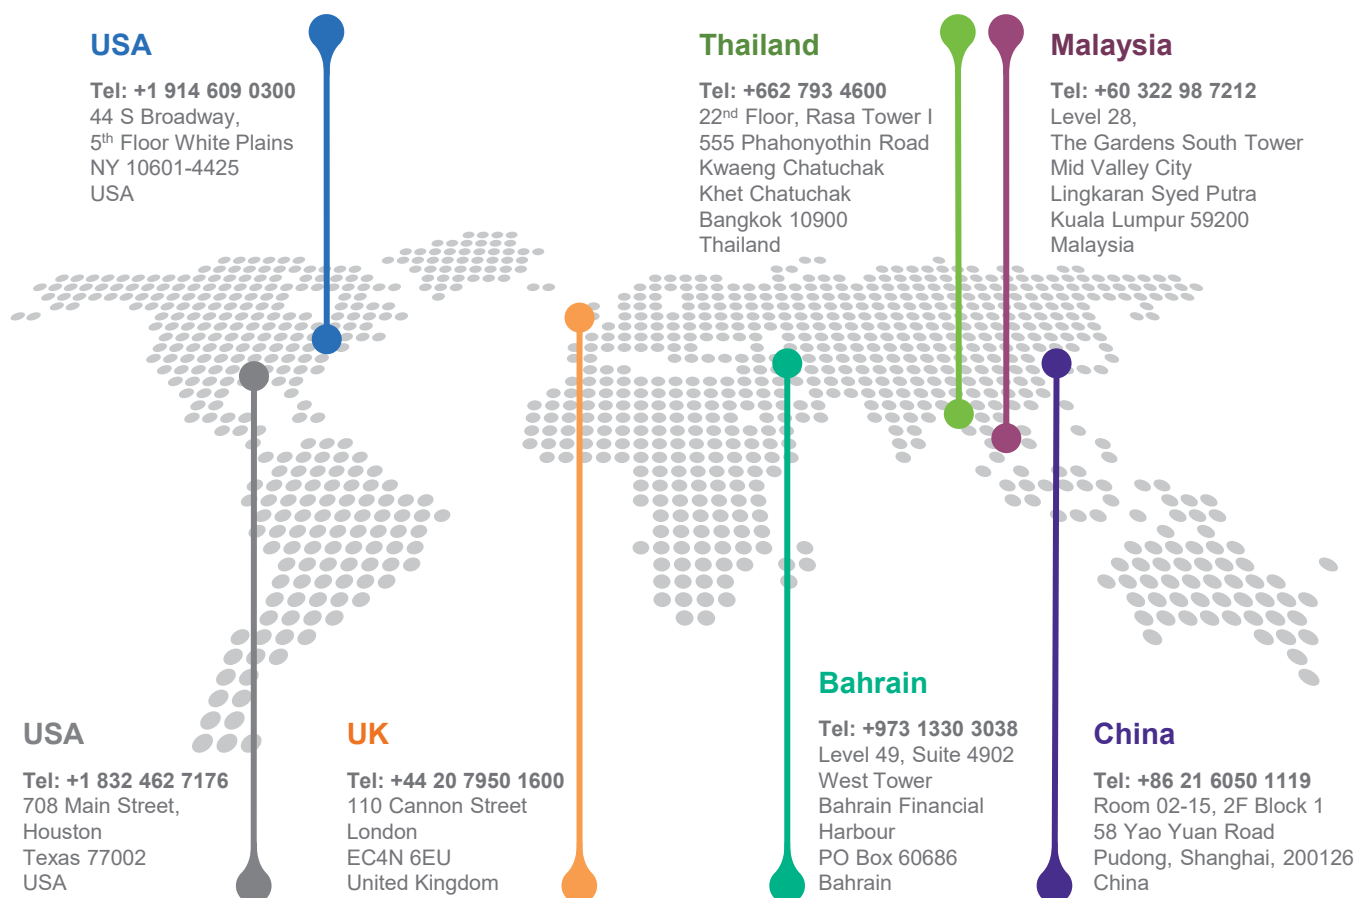

2023 REPORTS

- Algae Technology
- Bio-Polyols for Polymers
- Bio-Propylene
- Ethanol
- Low CI Marine Transport
- rDME
- Renewable Ethylene, EO, and MEG
- Renewable Power To Liquids: eChemicals
- Renewable Power To Liquids: eFuels
- Sustainable Fertilizers

NexantECA partners with clients to help them navigate the big global energy, chemicals and materials issues of tomorrow. We provide independent advice through our consulting, subscriptions and reports, and training businesses using expertise developed in markets, economics and technology through our fifty years of operation. We are entirely dedicated to supporting sustainable development of the industry and provide expert advice with efficiency, speed, and agility.
