The Technoeconomics – Energy & Chemicals (TECH) program is globally recognized as the industry standard source of process evaluations of existing, new and emerging technologies of interest to the chemical and energy industries.

An annual subscription to the 2019 TECH program includes twenty reports covering the topics listed below.

### Petrochemical Updates
- Linear Alpha Olefins
- Acrylic Acid and Esters
- Polypropylene
- Xylenes
- Polycarbonate
- Ammonia
- Urea
- Hydrogen Peroxide

### Special Topics
- Polyoxymethylene (Polyacetal)
- Detergent Alcohols
- Specialty Isocyanates
- Cobalt Extraction Technologies
- Maximizing Petrochemical Production from Refineries
- Specialty Polyesters
- Ultra High Molecular Weight HDPE
- Dimethyl Carbonate
- Recycling of Mixed Plastics Waste
- m-Xylene and Isophthalic Acid
- Air Separation Technology
- Flow Batteries for Large-Scale Energy Storage

Nexant Subscriptions and reports provide clients with comprehensive analytics, forecasts and insights for the chemicals, polymers, energy and cleantech industries. Using a combination of business and technical expertise, with deep and broad understanding of markets, technologies and economics, Nexant provides solutions that our clients have relied upon for over 50 years.

Technology and Costs comprises the Technoeconomics – Energy & Chemicals (TECH) program (formerly known as PERP), the Biorenewable Insights program (BI), the Sector Technology Analysis, and the new Cost Curve Analysis. These programs provide comparative economics of different process routes and technologies in various geographic regions.

Nexant serves its clients from over 30 offices located throughout the Americas, Europe, the Middle East, Africa and Asia.
